

Get Customer Orders Delivered for \$1 with XO Delivery!

How it works -

1. Customers order online and choose pickup or delivery.
2. If they choose delivery, a delivery charge will be added to the customer's tab depending on the location. In other words, customers will pay for the food, delivery fee and tip for the driver.
3. The payment will go directly to the restaurant as a pre-paid order (ExpressOrders needs to be previously integrated with the restaurant's POS).
4. The following day, the delivery fee, tip for the driver, and the \$1 ExpressOrders fee will be debited from the restaurant's debit card.

E.g.	Total food amount (including tax)	= \$20
	Delivery fee	= \$ 5
	Driver's tip	= <u>\$ 2</u>
	Total charge paid by customer	= \$27

Total deducted the next business day = \$ 8 (\$5 delivery fee + \$2 tip + \$1 service fee)
